

Notes 1

What is Markdown?

Markdown is a simple markup language used to format text using symbols. It can be used to create headings, bold text, lists, links, images, and more.

What is Git?

Git is a version control system that tracks changes to files and code. It allows developers to save different versions of their work and go back to previous versions if needed.

What is GitHub?

GitHub is an online platform that uses Git to store, manage, and share code and other projects. It also allows people to collaborate on projects.

What is Slack?

Slack is a communication and collaboration platform used by teams to communicate through channels, direct messages, file sharing, and other tools.
